GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A <u>riparian right</u> enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An <u>appropriative right</u> is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

nents of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation am from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

#### GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

<sup>&</sup>quot;Information Pertaining to Water Rights in California"

<sup>&</sup>quot;Water Rights for Stockponds Constructed Prior to 1969".

<sup>&</sup>quot;Appropriation of Water in California"

#### TAMARACK MUTUAL WATER COMPANY

APRIL 18, 1994

TO WHOM IT MAY CONCERN:

TAMARACK IS AN AREA ON THE WEST SHORE OF LAKE TAHOE WHICH COMPRISES ABOUT 20 HOMES. OUR SMALL WATER SYSTEM IS SUPPLIED BY RUBICON CREEK. THERE IS NO METERING SYSTEM, SO THE FIGURES WHICH I HAVE SUPPLIED ARE NOT EXACT. WE HAVE INQUIRED FROM TAHOE CITY PUBLIC UTILITIES DISTRICT WHAT THEIR AVERAGE HOUSEHOLD WATER USAGE IS DURING THE SUMMER MONTHS. THEIR ANSWER IS ABOUT 1000 GALLONS/HOUSE.

OURS IS ALMOST EXCLUSIVELY A SUMMER HOME AREA. THE FIGURES FROM TCPUD PROBABLY CORRELATE WELL WITH OUR VACATIONING RESIDENTS.

IF YOU HAVE ANY FURTHER QUESTIONS, PLEASE CONTACT ME. MY TELEPHONE NUMBER IS 415 327-3626

SINCERELY,

Caral P. Opensin CAROL SPIEKER

PRESIDENT, TAMARACK MUTUAL WATER CO.
